Brian,

The responses to KDHE's comments on the Draft SWMU 207 (SS544) RCRA Facility Investigation Report are generally acceptable with the following caveat:

- In the future, well purging equipment should be tested and made sure to be in proper working order so that issues such as the drawdown issue noted in KDHE Comment #3 are not issues in the future.

Please provide a revised copy of this document with an updated CD for review.

Sincerely,

Jacqueline Grunau
